International Journal of Fracture

CONTENTS OF VOLUME 58 (1992)

Vol. 58, No. 1, 1 November 1992

Integral equation approaches for curved rigid line problem in an infinite plate	Y.Z. CHEN and N. HASEBE	1
Acoustic emission sources modelled by dislocations	B. TIRBONOD	21
Pulse shape effects on the dynamic stress intensity factor	C. ZHANG and D. GROSS	55
The interaction of two inclined cracks with dynamic stress wave loadings	C.-H. TSAI and C.-C. MA	77

Vol. 58, No. 2, 15 November 1992

Brittle fracture of adhesive joints	A.R. AKISANYA and N.A. FLECK	93
Axisymmetric crack with a slightly non-flat surface	H.G. BEOM and Y.Y. EARMME	115
A finite element investigation of quasi-static and dynamic asymptotic crack-tip fields in hardening elastic-plastic solids under plane stress. Part II: Crack growth in power-law hardening materials	X. DENG and A.J. ROSAKIS	137
A solution for SIFs of part-elliptical cracks based on approximate crack surface displacement and energy method	G.S. WANG	157
Application of the Finite Element Iterative Method to cracks and sharp notches in orthotropic media	N. SUKUMAR and M. KUMOSA	177

Vol. 58, No. 3, 1 December 1992

Comparison between various displacement-based stress intensity factor computation techniques	I.L. LIM, I.W. JOHNSTON and S.K. CHOI	193
A new method for evaluating fracture toughness of brittle materials	J. TIROSH, E. ALTUS and Y. YIFRACH	211
Micromechanics of shear deformations in cracked bonded joints	H. CHAI	223
Variation of elastic *T*-stresses along slightly wavy 3D crack fronts	H. GAO	241
An effective numerical method for an interfacial crack in a finite bi-material plate	C.W. WOO, Y.H. WANG and Y.K. CHEUNG	259
Analysis of HRR fields of surface cracks	M. KIKUCHI	273

Vol. 58, No. 4, 15 December 1992

Numerical solutions of the singular integral equations in the crack analysis using the body force method	N.-A. NODA and K. ODA	285
The condition for the cyclic plastic deformation of the crack tip: the influence of dislocation obstacles	R. PIPPAN	305
On the singularity of temperature gradient near an inclined crack terminating at bimaterial interface	W.-H. CHEN and C.-C. HUANG	319
Higher order asymptotic field at the moving crack tip	Y. XU and L.M. KEER	325
Investigations on the stress intensity factor field for unstable dynamic crack growth	C.-C. MA and S.-K. CHEN	345
The specific enthalpy of fracture for beta Ti-15-3 alloy	I. MOSTAFA, G. WELSCH and A. MOET	361
